SPECIAL BLENDS

GLOW -(GHK-cu + BPC-157 + TB-500)

- A regenerative blend for skin, cellular repair, soft tissue healing, systematic inflammation & injury recovery
- Designed to support total body healing & rejuvenation

TONE-(CJC-1295 no DAC + Ipamorelin)

- Synergistic growth hormone releasing blend that stimulates GH product & increase IGF-1
- Enhances natural GH pulses without raising cortisol or prolactin
- Promotes fat loss, muscle growth, recovery & improved sleep

GAIN

- This advanced 4X blend combines GHRP-2, Tesamorelin, MGF, & Ipamorelin to maximize growth hormone release, muscle recovery, & fat metabolism
- It supports lean muscle growth, faster recovery, & improved body composition with a clean, balanced hormonal profile

WOLVERINE-(BPC-157 + TB500)

- Powerful healing blend that targets inflammation, soft tissue repair, joint recovery & cellular regeneration
- Commonly used for injury recovery, post-surgical healing & chronic inflammation

SCULPT-(Tesamorelin + Ipamorelin+MGF)

- A growth & recovery blend that boosts growth hormone & reduces visceral fat
- Supports muscle repair, hypertrophy & is ideal for fat loss, muscle building & anti-aging

REVIVE-(Tesamorelin + Ipamorelin)

- Dual GHRH & GHRP blend that stimulates pituitary growth hormone release & significantly reduces visceral fat without unwanted side effects
- Designed for fat loss, metabolic support & anti-aging

LONGEVITY

CJC-1295 - no DAC (Drug Affinity Complex)

- Increases endogenous IGF-1 boosting fat loss
- Minimal effects on ghrelin
- Thermogenic to help build muscle & boost fat metabolism

EPITHALON

- Anti-aging peptide that supports telomerase activity, cellular health, & longevity
- It may also improve sleep, immune function, and resistance to oxidative stress for overall well-being

GHK-CUG

- Copper binding peptide with powerful regenerative properties
- Supports collagen production, wound healing & overall skin rejuvenation
- Fights hair loss while supporting hair growth

SERMORELIN

- GHRH analog that stimulates natural growth hormone release
- Supports recovery, energy & sleep
- Improves muscle strength, growth & repair

SS-31

- Mitochondrial-targeting peptide that supports cellular energy, reduces oxidative stress, & enhances recovery by protecting mitochondrial function
- It may also improve endurance, reduce inflammation, & support long-term heart, brain, and cellular health

TESAMORELIN

- Growth hormone-releasing hormone (GHRH) analog clinically shown to reduce visceral fat
- Often used for body recomposition & metabolic enhancement

DRIVE

PT1-41

- Neuropeptide that activates melanocortin receptors
- Used to enhance libido & arousal in both men & women
- Not dependent on nitric oxide pathways like typical ED medications

HCG

- Mimics luteinizing hormone (LH)
- Used to stimulate natural testosterone production, preserve fertility & support testicular function during or after hormone therapy

WELLNESS

NAD+ BIOFERMENTED

- Essential coenzyme for mitochondrial function, cellular repair & energy production
- Supports cognitive clarity, anti-aging, detoxification & metabolic health

MOTS-C

- Turns available glucose into energy in mitochondria, insulin sensitivity, for oxidation & cellular resilience
- Studied for longevity, weight management & metabolic health

SELANK

- Nootropic peptide that reduces anxiety, enhances mood, & improves memory and focus without sedative effects
- It supports mental clarity by balancing neurotransmitters & may also promote immune health and overall well-being

SEMAX

- Cognitive-enhancing peptide that improves focus, memory, & mental clarity by increasing BDNF & supporting neurogenesis.
- It also helps reduce mental fatigue, improve mood, & protect long-term brain health.

DSIP

- Neuropeptide that promotes deep, restorative sleep & balances circadian rhythm
- Studied for stress reduction, hormone regulation & neuroprotection

THYMOSIN ALPHA 1

- Immune-modulating peptide that enhances T-cell activity, fights infections & supports immune resilience
- Studied in cancer therapy, chronic infections & immune aging

TB-500

- Synthetic version of Thymosin Beta-4
- Promotes healing, reduces inflammation & improves flexibility
- Commonly used for injury recovery chronic inflammation & tissue repair

OXYTOCIN

- Naturally occurring peptide known for promoting emotional bonding, trust, & a sense of calm & well-being
- It may also support mood regulation, stress reduction, & overall cognitive and physical wellness

IPAMORELIN

- Selective growth hormone secretagogue
- Promotes lean muscle growth, fat loss, recovery & improved sleep without increasing cortisol & prolactin

KISSPEPTIN

- Naturally occurring peptide that supports hormonal balance by triggering GnRH release & stimulating key sex hormones
- It may help promote fertility, libido, & overall well-being by enhancing the body's natural hormone regulation

TESOFENSINE

- A potent weight-management compound that reduces appetite & cravings by inhibiting dopamine, serotonin, & norepinephrine reuptake
- It supports fat loss, improves energy & mood, & helps promote sustainable weight control

BPC-157

- Body Protective Compound- promote healing of joints, muscles, tendons & the digestive track
- Reduces inflammation & accelerates recovery

AOD-9604

- Modified fragment of HGH, specifically targets fat metabolism
- Promotes lipolysis without affecting blood sugar or IGF-1 levels & stimulates Lipolysis (breakdown of fat)
- Does not enhance hunger or blood sugar levels

IGF-1 LR3

- Insulin- like growth factor 1
- Promotes muscle growth, fat metabolism & cellular repair
- Supports recovery, lean mass gains & anti-aging effects

PERFORMANCE

TB-500

- Synthetic version of Thymosin Beta-4
- Promotes healing, reduces inflammation & improves flexibility
- Commonly used for injury recovery chronic inflammation & tissue repair

TOTAL PERFORMANCE

- Insulin- like growth factor 1
- Promotes muscle growth, fat metabolism & cellular repair
- Supports recovery, lean mass gains & anti-aging effects
